

### Blueprint Match

- Architectural grade veneers are matched for continuity of grain and color for various size panels, doors, and transoms.

### Sequence Match

- All panels are uniform length.
- Architectural grade veneers are matched for color and all panels of the same size will have continuity of grain.
- Other size panels must be cut during installation which may interrupt grain continuity.

### End Match

- Veneer is book matched end-to-end as well as side-to-side.
- Wood grain is continuous in length, as well as width.
- Appropriate when panel height exceeds the veneer length.
