

SUSTAINABILITY

Eggers Industries offers architectural wood doors, panels, conference tops and components that are certified by the SmartWood program. This independent, third-party forestry certification program of the Rainforest Alliance is accredited by the Forest Stewardship Council (FSC). FSC-certified wood products contribute points toward the LEED® (Leadership in Energy and Environmental Design) and Green Globes™ programs.

Eggers offers an environmentally friendly UV-cured finishing system that meets AWI standards. Consisting of water-based stains and 100 percent solid clear coats that are free of Volatile Organic Compounds (VOC), Eggers' Gardall system features 6 coats of high-quality finish. Gardall Plus uses an additional topcoat to give a semi-filled look to the wood grain, while Gardall Supreme is hand-rubbed for a filled finish.

COMPANY OVERVIEW

From historical renovations to sleek, modern designs, Eggers produces the finest architectural doors, panels, conference tops and veneered components for premier commercial projects.

Eggers Industries

Turning nature's beauty into works of art

A TRADITION OF TURNING WOOD INTO ART

Eggers is a visionary company. We continually push ourselves to create the best architectural wood products, and invite you to partner with us for your complex and challenging projects.

Artisanal Heritage with Cutting-Edge Capabilities

In 1884, it started. That's when Fred W. Eggers opened the doors of his business and embarked on a journey to make the finest, most beautiful wood products.

He started by selling wood baskets to local farmers, but his business quickly grew as he began to manufacture wood products for all types of applications. Whether it was veneer adorning the interior of a World War II British Mosquito bomber or a custom conference tabletop in the Cabinet office of the White House, people throughout the world began to notice the impeccable craftsmanship of Eggers Industries.

Today, our top-of-the-line technology enables us to do so much more. We recognize that machines exist not as a substitute for craftsmanship, but as an aid to it. We understand the very soul of wood. We know the best use of each wood type and the appropriate species for your projects. We can provide you with the answers you need and the knowledge that goes along with it.

World-Class Manufacturing Facilities

With two state-of-the-art facilities, we are fully set up to meet all your manufacturing needs, as well as the exacting standards of AWS and WDMA.

Neenah Division focuses solely on 5-ply architectural flush doors. It offers door slabs, prefinished, premachined, glazed and any combination required. Our flush division excels in specialty applications, providing fire-rated, lead-lined, bullet-resistant, impact resistant and acoustical doors with the highest industry ratings.

Two Rivers Division is a multi-capability plant where we manufacture true stile & rail doors, 5-ply architectural flush doors, sketch face doors, wood frames, architectural and blueprint matched panels, conference tabletops, veneer wrapped trims utilizing various substrates including metal, plus a variety of custom plywood applications which can be premachined and prefinished.

EGGERS PRODUCTS, SERVICES AND CAPABILITIES

Doors

It's not without reason that Eggers is immediately associated with doors. From the Four Seasons Hotel, Trump Towers and Johnson & Wales Culinary Academy to community hospitals, schools and religious centers, every single door that we produce exemplifies beauty and performance.

- **True Stile & Rail Doors**

Eggers has the widest choice of wood species available. We produce and prefinish custom profiles with 20- to 90-minute ratings. Acoustical ratings are available through STC 40. Full-lites, true-divided lites and grillwork options are also available.

- **Flush Doors**

Our 5-ply flush doors set the standard for this versatile category of architectural doors. They're available in fire ratings through 90-minute and come in a variety of species, from domestics to rare exotics. Specialty applications include lead-lined, acoustical, impact resistant and bullet-resistant.

- **Stylus Doors**

Eggers Stylus doors bring together the superior functionality of 5-ply flush doors and the elegance of stile & rail doors. A cost-effective alternative to stile & rail doors, they're fire-rated through 90-minute and available in a large range of profiles to match existing doors. Stylus doors are available with STC ratings 31, 32, and 33, depending on core type.

Architectural Paneling and Components

Walls, ceilings, columns, tabletops – anywhere you desire to add the richness and elegance of wood – Eggers has the expertise and knowledge to bring it to perfect form. Our experience in producing architectural paneling and components is extensive and varied.

- Architectural plywood paneling for all interior surfaces including yachts and elevator cabs.
- Conference tops.
- Furniture components.
- Ceiling panels.
- Veneer-wrapped trims and profiles.
- Cut-to-size panels.
- Curved panels.

Our machining capabilities not only allow us to provide the best matching and patterning options, but also makes custom construction an easily achieved reality for you.

Customer Care, Service and Guarantees

As proud as we are of our manufacturing capabilities and state-of-the-art systems and machines, we take greater pride in our customer relations.

Our focus is on you – how we can better help you and how we can make your experience with us easier, smoother and totally worry-free. That's why we're always improving our value-added services, which now include:

- **Fast Track Always Available**

A special expedited service that guarantees shipment in as little as 4 working days for flush doors, 11 working days for door frames, and 15 working days for stile & rail doors.

- **Packaging and Care**

We coordinate logistics and freight to your terms, and pack and ship according to your specifications.

- **Continuing Education**

We conduct AIA/CES courses throughout the year so you can stay well-informed and up-to-date on the latest industry issues and developments. You'll also earn credits toward your CE requirements.

- **Distributor Training Program**

Eggers Institute is a comprehensive, 2-day program for distributors to hone their technical expertise and stay updated on industry topics. Eggers Institute offers courses ranging from door constructions to finishing and repair techniques. Distributors are given the opportunity to tour our cutting-edge manufacturing facilities. All Eggers Institute courses are approved through the Door & Hardware Institute to earn technical points toward AHC, CDC, EHC and AOC certifications. Sessions are held each spring and fall.
