

INTRODUCING

Eggers Improved Sample Books

Eggers finish samples now have a new look! The process remains the same but now you will receive your samples neatly organized into a convenient book to keep the sample set together. Our standard set of (3) finish samples continues to be delivered - the only change you will notice is the new jacket, designed to accommodate the three samples that create the set.

Our enhanced finish sample books will continue to represent a light, medium and dark veneer color in the finish specified. These sets contain three samples with the same stain formulation on varying base veneers.

Approval of the finish sample book equates to approving the full set of light, medium and dark samples.

When ordering samples, please do so in terms of sets. If you require samples for the general contractor, architect and yourself, you will be ordering (3) sets.

Order your samples today by contacting your Inside Sales Representative.
