FSC Product Changes

Due to the continued importation of illegally harvested wood, the Forest Stewardship Council (FSC) has updated their 2009 procedures for certification. FSC now requires that the origin of all wood species and the methodology in which the wood was harvested be documented in order for them to be used in FSC products.

What this change means is that FSC now requires all **imported wood veneer and lumber** to be FSC certified. If FSC material is not available, Eggers cannot quote that project for FSC certification. When FSC material is not available, the alternative is to consider a domestic species or an alternate imported veneer which is FSC certified.

If you have any questions please contact Mike Miller, Director of Environmental Stewardship at mmiller@eggersindustries.com or 920.722.6444.
